

# CREATE your own SIGNUS ONE 6mc

## Design process

Create awesome 3D artwork impressions for upcoming campaigns and events. It's child's play with the Signus 3D Generator. You'll be ready in just 4 steps.

### 1 | Design

### 2 | Visibility

### 3 | 3D Generator

### 4 | Print file

## Design process

Design

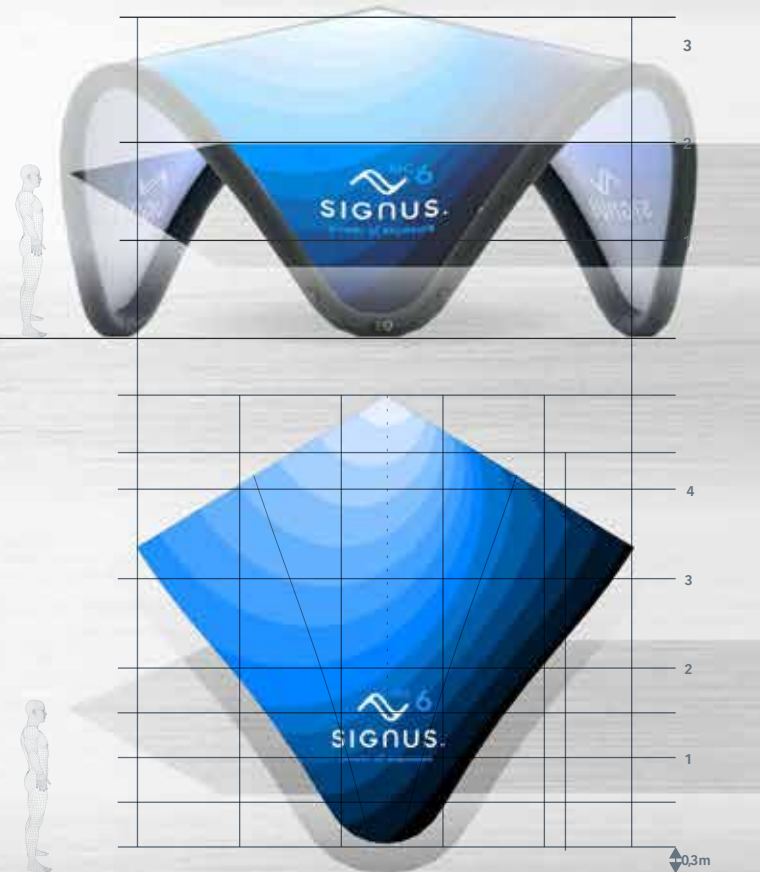

- go to the 3D Generator
- download the 6mc template
- create the design in your favorite program
- save it for the 3D Generator as RGB/JPG PNG/<1MB

## Design process

Visibility

- 13 m<sup>2</sup> of printable surface per canopy
- position the logo, tagline, and key information about your brand at the eye level of your audience
- 3 canopies: up to 3 different designs

## Design process

3D Generator

- go to the 3D Generator
- import your design
- the file must be:
  - PNG or JPG
  - RGB
  - Maximum file size 1 MB
- enjoy the preview of your design from every angle.

## Design process

Print file

## Working drawing specs

### Resolution

- 200dpi (for 100%)
- template is 10% of actual size
- working drawing (10%): 2,000dpi

### Please note

- don't position the logo and text too high
- don't position the logo and text too close to the edge

### Saving and sending

- save as full-color PDF
- send it ([wetransfer.com](http://wetransfer.com)) to [design@signusinflatables.com](mailto:design@signusinflatables.com)
